

# Swiss Life starter account

## Challenge and solution

Would you like to combine assets from different sources at Swiss Life and invest them? Then the starter account is the right solution for you. You invest a larger amount in one of our investment solutions. At the same time, a standing order is set up which enables you to invest additional money each month in the desired investment solutions.

## This is how it works

You invest a certain amount in one of our investment solutions – the initial investment must be at least CHF 25 000. At the same time, you define the amount to be transferred to the starter account as well as the

monthly amount – with a minimum amount during the first year of CHF 2000 – that is to be invested in the investment solution from the starter account.

## Your advantages

- By simultaneously investing in one of our investment solutions, you can transfer savings or payments from your current pension solutions directly to the starter account.
- With regular investments via the starter account into one of our investment solutions, you can profit from the cost averaging effect.
- Money can be collected and invested cost-effectively and efficiently.

## Facts and figures

### The offer
