

SwissLife

Swiss Life ELM

Efficient HR administration

As of this year, the uniform salary reporting procedure (ELM) has also been available for occupational pensions. Swiss Life is one of the first providers to be able to receive your salary data directly from the payroll accounting system without you having to report it separately.

Check whether your payroll accounting system complies with ELM standard 5.0 in order to benefit from the change. Then all you have to do is enter Swiss Life as the data recipient – that way you can reduce your administrative work. Simple, fast and convenient.

ELM is offered by the swissdec association.

Your advantages:

-
- Reduced outlay
 - Fewer errors to be corrected
 - Data sent quickly
 - Fully digitalised process
 - High level of security
-

ELM makes it easy to send the following notifications directly to Swiss Life:

-
- Salary changes
 - Changes in level of employment
 - Changes of address
 - Personal data changes
 - Annual updates
 - New joiners
 - Leavers (incl. retirement, disability, death)
 - Start/end of salary interruption
 - Changes in groups of insured persons / plans
-

You will immediately receive confirmation of the new BVG/LPP contributions after notifying us of the changes.

For more information, scan the two QR codes.

Should you have any questions, please contact elm@swisslife.ch.
