NAV fund: 39.53 M CHF | NAV per unit: 105.29 CHF

Morningstar® ★★★★★

## Management Commentary

October brought negative returns for equities. Investors were largely concerned due to the economic outlook, although the US economy displayed strength. The upcoming US elections increased uncertainty. Within equity markets, US equities lost less than other regions, while the emerging markets lost most due to China. A strong labour market and persistent inflation are making further interest rate cuts in the US less likely. This drove the interest rates of US bonds back above 4.0%, resulting in negative returns for global bonds. The fund closed the month with a negative return.

## Investment Strategy

The fund is broadly diversified and invests in equities, bonds, real estate and, if necessary, risk hedging instruments. An active, time-optimised management approach is applied in which the risk/return profile is actively aligned to the respective market situation and the remaining investment horizon.
