NAV fund: 29.01 M CHF | NAV per unit: 109.05 CHF

Management Commentary

In March, financial markets continued their upward trend, supported by robust economic data, falling inflation rates and unwavering investor confidence. Global equities again posted positive gains. Thanks to the surprise interest rate cut by the Swiss National Bank, the appreciation of the US dollar and euro led to additional gains for CHF investors. Bond markets delivered positive returns thanks to slightly lower interest rates and tighter risk premia. Swiss real estate and alternative investments also performed well. Overall, the fund's performance was positive in March.

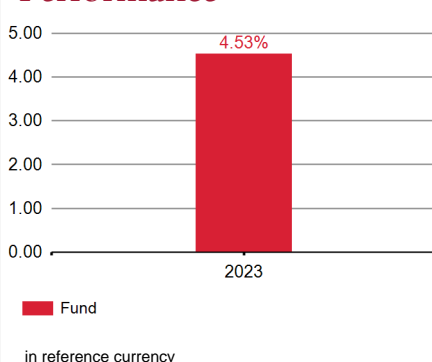

Investment Strategy

The fund is broadly diversified and invests in equities, bonds, real estate and, if necessary, risk hedging instruments. An active, time-optimised management approach is applied in which the risk/return profile is actively aligned to the respective market situation and the remaining investment horizon.
